I am currently pursuing a Graduate Diploma in IT at Wellington Institute of Technology and also taking an online course about Web Development on Udemy/YouTube during my free time. I am interested to work in a tech company as a software developer in the future. I am looking for a junior developer role to apply the knowledge, skill and experience I have learnt to real life work in the industry

Technical Skills

Basic Web Development: HTML, CSS, Bootstrap, JavaScripts, Reactjs

Data Analytics: Basic SQL, Python, NLTK, Scikit-learn, Microsoft Excel

Graphic: SolidWorks, Adobe InDesign, Wireframing tool (Marvel)

Others: Unity, .NET MVC, Embedded System with Raspberry Pi/Arduino, Microsoft Project

Personal Skills

Coordination and communication: Working as a project coordinator, I experienced cooperation with team members, clients and reporting to project manager and higher management.

Teamwork/Independent Working: Both working as a project coordinator and working in hospitality or even in school group work, I have learnt to work in a team to finish my own job or help others when I can, in order to make the team reach our goal.

Time management: I have managed my time effectively throughout my studies, allowing me to juggle part-time employment while meeting all my deadlines. I also did my Master's degree part-time while working full-time.

Customer service: My hospitality experience allowed me to develop skills to serve/negotiate with customers in a professional manner and deal with different types of people.

Self-Learning: Always develop myself in various skills during my free time, especially in this area where I can find online courses or answers from Google.

Leadership: Had the opportunity to train and supervise some new staff in my hospitality role.

Documentation: As I worked in Management System Certification Institute, I have some experience in retaining information clearly in documents as the relevant standard required.

EXPERIENCE

Note: 2020 is my gap year in New Zealand
